Summary

Full-stack developer who builds production software end to end: a practice-management CRM a UK accountancy firm runs on every working day, a lead-generation engine and a video pipeline, alongside Shopify and WordPress builds for clients in the UK, the USA and Canada. Works in TypeScript, React and Node.js.

Experience

Mirasphere Digital

Jul 2025 – Present

Website Developer

Gurugram, India

- Delivered **7+** client websites and stores on WordPress, Shopify and React, from build to post-launch support.
- Built Shopify themes from Liquid sections clients edit themselves; rebuilt a product template measured at **12–16 s** LCP.
- Connected a recruitment site's CV form to Zoho Recruit, so applications land as candidate records, not email attachments.
- Sole developer, from design to deployment, on three products built at the company:

SATCHEL — Practice CRM | *TypeScript, React, Fastify, PostgreSQL, Redis, Docker*

Case study

- * Practice CRM in daily use at **Fordham Finance Group**; from first commit to production in about **8 weeks**.
- * Migrated years of client history with **zero data loss**, using additive-only schema changes and dry-run imports.

Companies House Lead Engine | *Python, pandas, FastAPI, PostgreSQL, React, Docker*

Case study

- * Turns the UK company register into pre-qualified leads at **£0 per lead**, checking each filing deadline live first.
- * Scans a **171,876**-company cohort in about 6 minutes, with **zero** rate-limit incidents across 22 production jobs.

Mirasphere Studio — Video Pipeline | *Next.js, TypeScript, Remotion, ElevenLabs*

Case study

- * Turns a script into a branded 30-second voiceover video in about **8 minutes**, with a lip-synced presenter from one photo.

Virtuoso.live

Jul 2024 – Jun 2025

Frontend Developer (Contract)

Remote

- Built the store, event and artist pages and dashboards of a live-events web app in TypeScript and React. Case study
- Built accounts, sessions and permissions for the community layer, and fixed a long-standing role-based access bug.
- Kept the app running through a mid-project move to AWS (S3, RDS PostgreSQL); fixed **10+** production bugs in 4 sprints.

Self-employed

Jun 2022 – Apr 2025

Freelance Web Developer

Remote

- Delivered **16+** projects and **12+** agency collaborations on WordPress and Shopify for UK, US and Canadian clients.
- Raised Lighthouse performance from about **40** to **85+** on several client sites by fixing LCP, layout shift and asset weight.

Independent Project

Competitive Ads Extractor | *Node.js, Meta Ad Library API*

Case study

- Groups competitors' live Facebook and Instagram ads into hooks, offers and gaps; **361** ads across 6 industries.

Skills

Languages: TypeScript, JavaScript
